

CONSENT AGREEMENT

The buy-down incentive for the solar electric (“System”) installed in your home will be provided by Energy Trust of Oregon, Inc. (“Energy Trust”). Energy Trust is an Oregon nonprofit corporation dedicated to helping Oregonians reduce reliance on fossil electric generation through energy efficiency and renewable power.

This Consent Agreement (“Agreement”) commences on the date the purchaser of the solar electric system (“Owner”) and Energy Trust sign this Agreement and terminates ten years later. This Agreement may be terminated earlier if the Oregon Public Utilities Commission instructs Energy Trust to terminate this Agreement or Energy Trust, at its own discretion, terminates this Agreement.

Energy Trust (all references to Energy Trust shall also include Energy Trust’s contractors) may need to conduct a quality assurance review and/or evaluation of your home to verify and report on the installation of the System, resulting savings and/or effectiveness of the System. For these purposes, Energy Trust may need access to your home and need to share information regarding your home with contractors of Energy Trust, who will be bound to these same provisions.

1. The purchaser of the solar electric system (“Owner”) gives permission to Owner’s electric utility to provide a representative of Energy Trust with Owner’s electric utility billing information, which Energy Trust will use to estimate savings.
2. If Energy Trust selects Owner’s home for an inspection by a quality assurance agent, Owner agrees to allow access to their home for inspection, including permitting such agent to read Owner’s electric meter.
3. If the site is later selected for an evaluation, Energy Trust may contact Owner to request further access to their home, to talk about the system with occupants of home and in rare cases, for spot metering.

Energy Trust will not provide information acquired through the above actions about Owners to others except as stated above, will schedule an inspection or evaluation at a time convenient for Owner and will make every effort to limit the burdens on Owner’s time.

Under this Agreement, Owner also agrees to transfer any right to ownership of any “Environmental Attributes” from operation of the System to Energy Trust for the term of this Agreement. Environmental Attributes are any and all credits, benefits, emissions reductions, offsets, and allowances, howsoever entitled, resulting from the avoidance of the emission of any gas, chemical or other substance attributable to the System which are deemed of value by Energy Trust. Owner will not claim that the System is receiving or using any Environmental Attributes, but may claim that they are facilitating the production of Environmental Attributes, which are deemed of value by Energy Trust. If Owner claims they are facilitating the production of Environmental Attributes, Owner shall make it clear that their System was made possible with funding from Energy Trust.

If you agree to the terms of this Agreement, please sign below.

EXECUTED IN DUPLICATE on the dates indicated below.
