

The Power to Save Energy

Energy gives us
the power

Energy at our fingertips

In a typical business, up to 30 percent of energy is wasted.

Kilowatt hours =
electricity

- ✓ Lighting
- ✓ Cooling
- ✓ Computers
- ✓ Office equipment

Therms =
natural gas

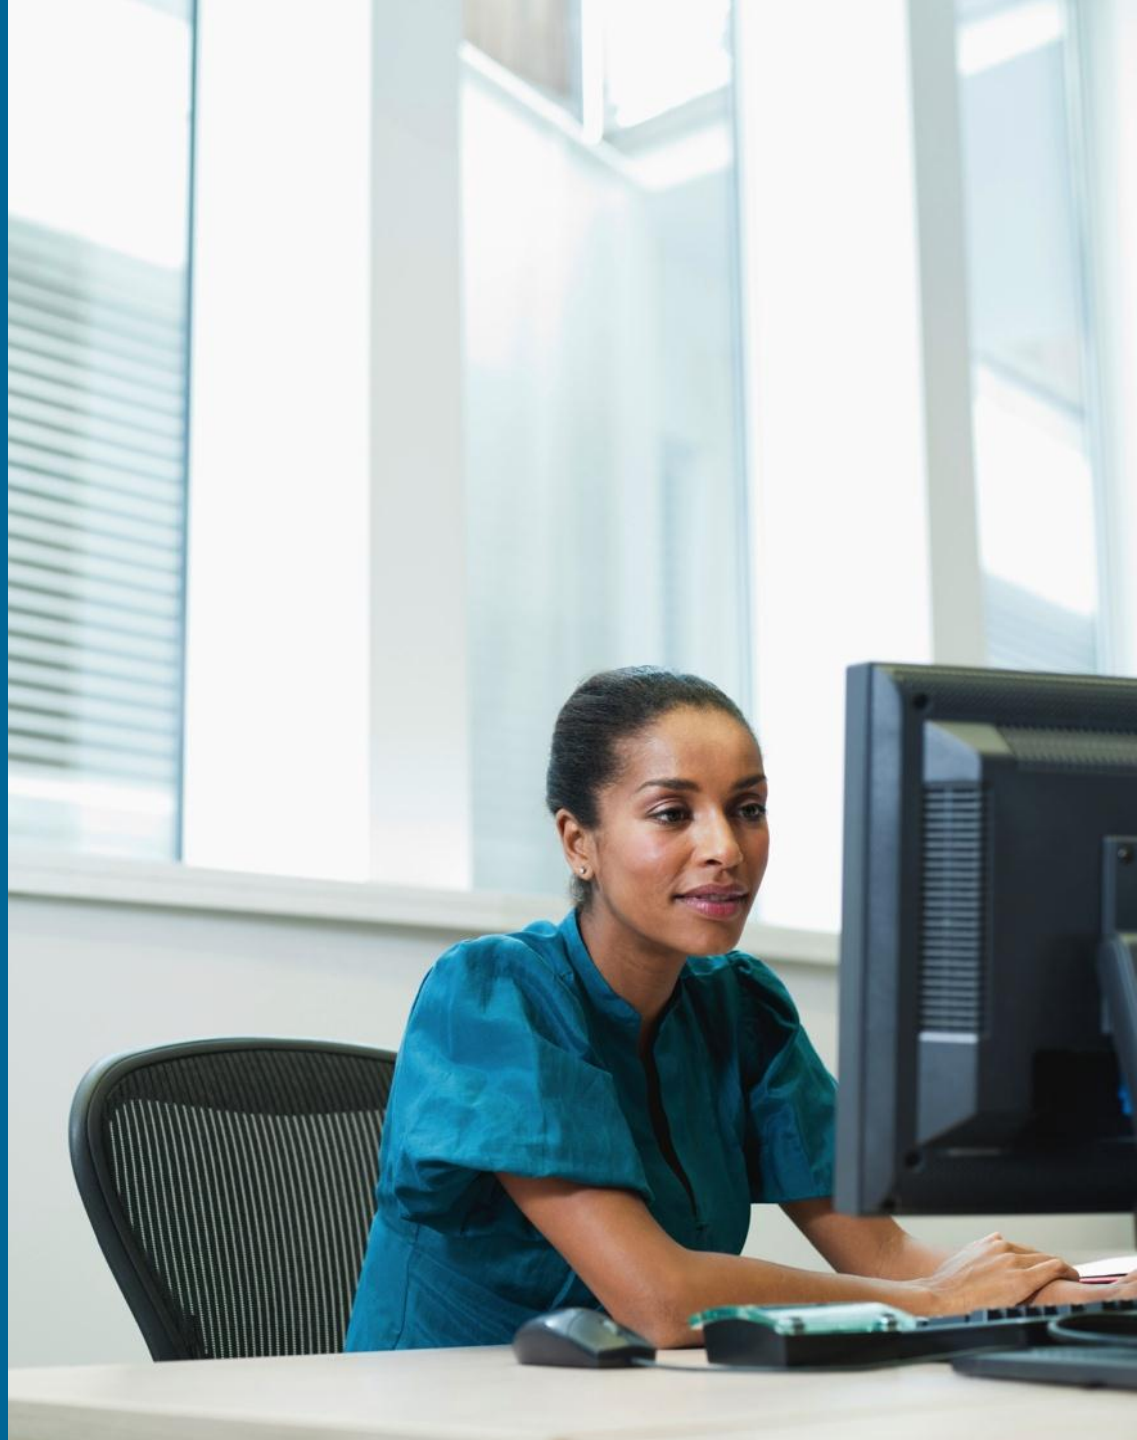

- ✓ Space heating*
- ✓ Water heating*

* Some businesses use electricity for space heating and water heating

Turn it off!

2 hours/day
x 5 days/week
x 50 weeks
= \$8 saved/year

Every hour matters
and each of us
makes a difference

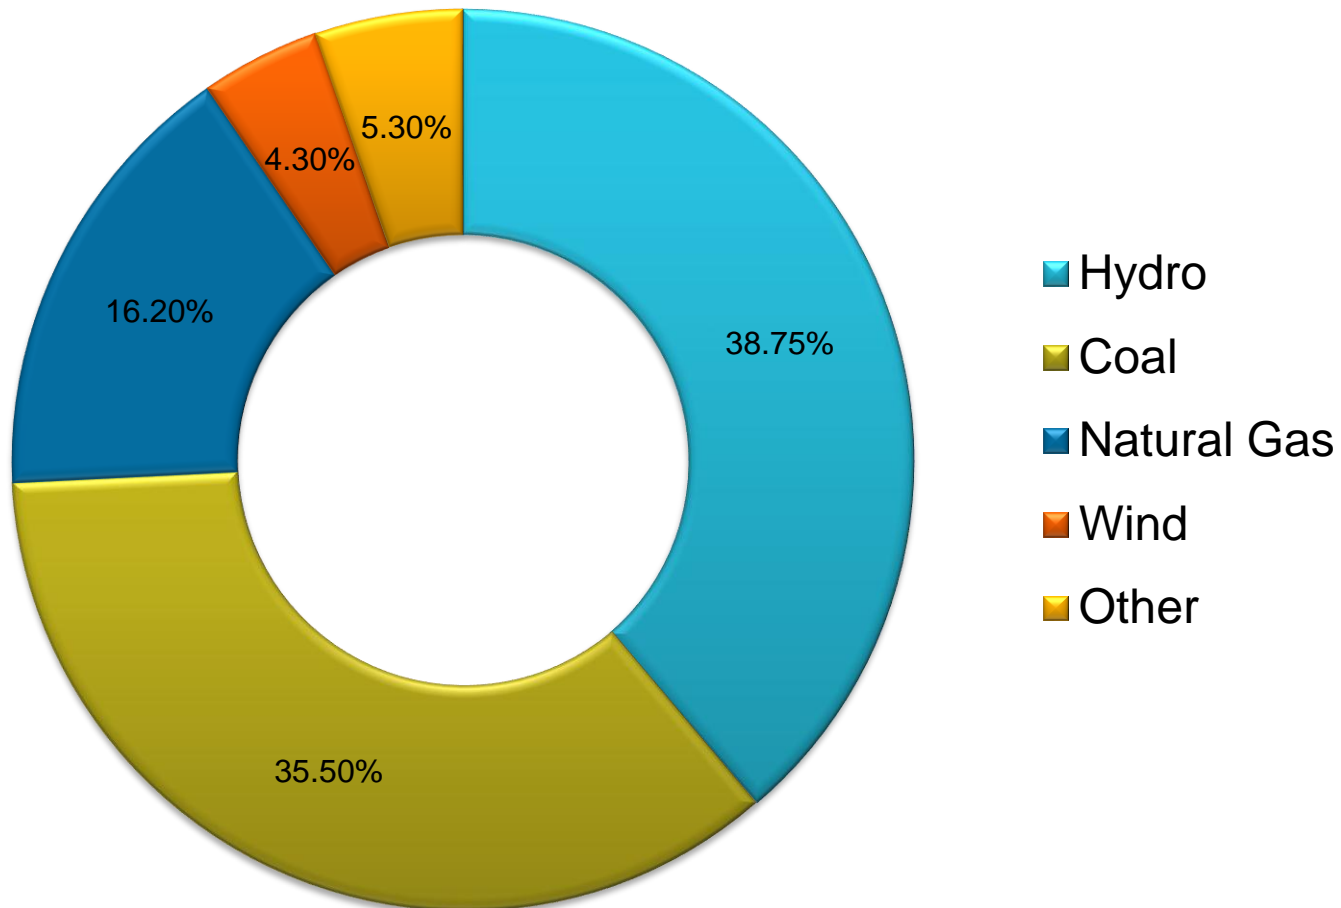

Business benefits of saving energy

- Reduces operating costs
- Strengthens competitive advantage
- Frees up resources to invest in our business and our employees

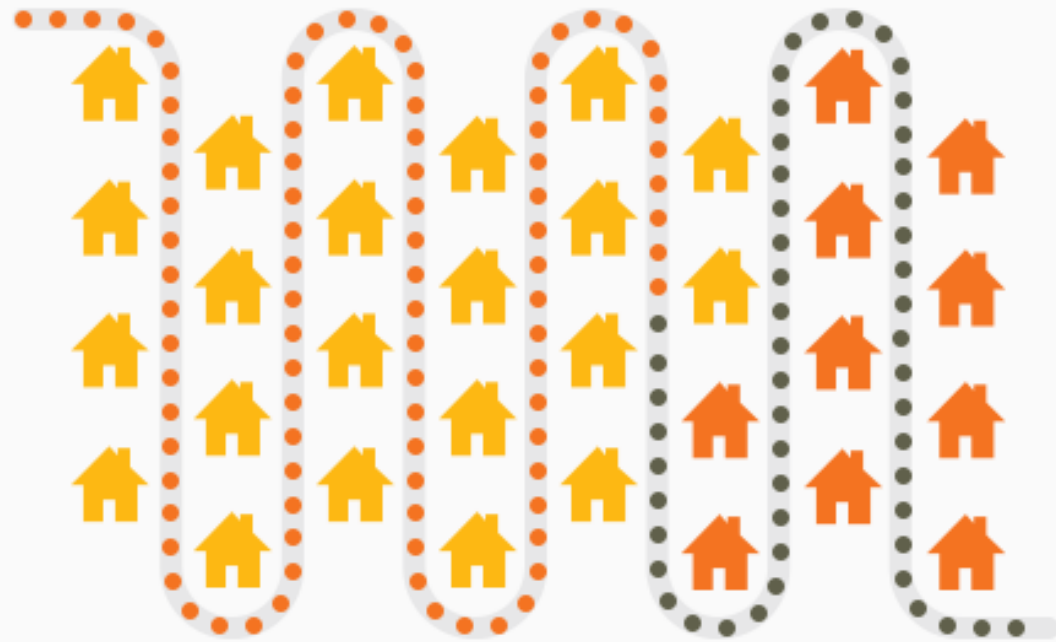

Electricity generation in Oregon

Environmental & health benefits of saving energy

- Conserves natural resources
- Reduces air pollution

Commercial energy use

Heating, cooling and ventilation (37%)

Lighting: interior & exterior (38%)

Electronics, equipment, etc. (17%)

Water heating (8%)

Where's the waste?

- Lighting
- Heating, cooling and ventilation
- Electronics and equipment

YOU have the power to
save energy

Turn off
computers
and monitors

Skip the
screen saver

Switch off
the lights

Turn off task
lighting

Unplug
devices and
chargers

Don't change
thermostat
settings

Use a power
strip at your
desk

Stop using
space heaters

Turn off equipment

Keep heating
and cooling
vents free of
clutter

Go paperless

Close window
shades on hot
days

What energy-
saving ideas
do you have?

So what's in it
for all of us?

Business benefits

Personal rewards

Want to do even more?

- Join or start a green team at our company
- Get creative about new ways to save
- Track down and save wasted energy at home. Energy Trust can help.

Thanks for all you do!
