

LOWER THE COST OF COZY

Receive cash incentives for heating upgrades that save energy, save money and improve the comfort of your home.

SMART THERMOSTATS

These genius devices don't just look smart; they reduce energy costs while keeping the temperature in your home just right. Get cash back for qualified models from popular brands like Nest and ecobee.

WHAT MAKES A SMART THERMOSTAT SO SMART?

It makes automatic adjustments to boost comfort and savings.

You can control it from your phone, tablet or computer.

It can learn and adapt to your daily schedule.

GAS FIREPLACES

Safe and easy to operate, high-efficiency, direct-vent gas fireplaces provide heat directly to the interior spaces where they're installed. They're also easier to operate than traditional wood-burning fireplaces and offer better indoor air quality.

GAS FURNACES

Keep your home warm, comfortable and energy efficient by upgrading to an ENERGY STAR® qualified high-efficiency gas furnace. A new gas furnace can deliver clean, consistent heat while using less energy overall, so you can enjoy a cozier home, bigger energy savings and lower monthly bills.

HEAT PUMPS

Heat pumps deliver consistent comfort and save a considerable amount of energy by moving heat in or out of your home depending on the season. Because they move heat rather than generating it, you can shave as much as 50 percent off your heating and cooling costs.

DUCTLESS HEAT PUMPS

Discover the ductless advantage. You can cut heating costs by up to 40 percent with an efficient ductless heat pump system. Plus, air conditioning comes as standard, for year-round comfort.

BENEFITS OF GOING DUCTLESS

Quiet and compact zonal heating and cooling

No ductwork = easy installation

Reduces electric heating costs by up to 40 percent

Built-in air filter improves air quality

Did you know?

In one year, the average home, when heated by a ductless heat pump, can save enough energy to brew 75,000 cups of coffee.

1 ductless heat pump

12 months

75,000 cups of coffee
