

LIGHTEN UP WITH LEDs

INSTANT INCENTIVES FOR BUSINESS CUSTOMERS IN OREGON

Energy Trust of Oregon can help you save energy and money—and it's as easy as changing a light bulb. New LED replacement lamps can be an excellent way to enhance lighting quality and cut operating costs. And when you buy qualifying LED lamps from a Lighten Up with LEDs participating distributor, you can take advantage of instant incentives that reduce your purchase price.

Incentives are available for business customers with an eligible commercial, industrial or multifamily (2+ units and for common area lamps only) site in Oregon that receives electrical service from Portland General Electric or Pacific Power. Additional limitations and requirements apply. Details and incentives are subject to change.

LEDs Offer More

Lighting can account for more than 20% of a typical business's energy use. Replacing your incandescent lamps can:

- **Lower utility bills.** LEDs may help save up to 75% on lighting energy.
- **Reduce maintenance.** LEDs can last up to 50 times longer than incandescent bulbs and up to five times longer than CFLs.
- **Increase savings.** LEDs produce very little heat, potentially cutting air conditioning costs.

- **Provide high-quality light and color.** LEDs achieve full brightness instantly and are available in cool, neutral and warm color temperatures.
- **Increase durability.** ENERGY STAR® certified LEDs typically come with a minimum three-year warranty.

Saving Is as Easy as 1, 2, 3

- 1** Find participating distributor at www.energytrust.org/LightenUpDistributor. Bring samples of the lamps you want to replace when you visit the distributor.
- 2** Buy qualifying lamps from the participating distributor and get instant incentives for a reduced purchase price.
- 3** Install the new lamps and start saving energy.

Find the Lamp That's Right for You

Incentives are available for qualifying lamps you install at your site. Incentives are subject to funding availability and may change. A participating distributor can give you more information and help you identify qualifying products that meet your needs.

Here are just a few examples of lamps you might have and their energy-efficient replacements. Lamps shown are examples only. Actual products offered by participating distributors will vary.
