

# Incentives – Oregon Home Retrofit – Savings Within Reach

Residential | Information Sheet | PI 320<sub>MIT</sub>

Incentives for Oregon customers of Portland General Electric, Pacific Power, NW Natural, Cascade Natural Gas and Avista.

All Savings Within Reach work must be performed by a Savings Within Reach Trade Ally and comply with <a href="#">Home Retrofit Specification Manual</a> requirements. Incentives listed are paid to the trade ally.		
Energy Improvement	Requirements	Incentive
<b>Attic Insulation</b>	If R-11 or less, insulate to R-38. A UL-listed carbon monoxide detector must be installed when a combustion appliance exists in the home, garage or other attached space.	\$0.50 per square foot.
<b>Wall Insulation</b>	If R-4 or less, insulate to R-11, or fill cavity. A UL-listed carbon monoxide detector must be installed when a combustion appliance exists in the home, garage or other attached space.	\$0.50 per square foot.
<b>Floor Insulation</b>	If R-0, insulate to R-30, or fill cavity. A UL-listed carbon monoxide detector must be installed when a combustion appliance exists in the home, garage or other attached space.	\$0.40 per square foot.
<b>Ductless Heat Pump</b>	HSPF 9.0 or greater. Compressor must be inverter driven. Incentive only available for homes replacing electric resistance heat or electric furnace as primary heat source of home.	\$1000 per residential structure.
<b>Ducted Heat Pump</b>	HSPF of 8.5 or greater. Must replace electric resistance heat (baseboard, wall heaters, electric furnace) as primary heat source. Additional incentives are also available for installing new heat pump controls, see controls incentives below.	\$1000
<b>New Heat Pump Controls</b>	Can be combined with ducted heat pump incentive. Must be added to a new heat pump with electric furnace auxiliary heat. Heat pump must be primary heat source. Visit <a href="http://www.energytrust.org/heatpumpcontrols">http://www.energytrust.org/heatpumpcontrols</a> for eligible models and more information. Thermostat must be set to 35°F lockout or as close as possible. Cannot be combined with other controls incentives.	\$250

Residential | Information Sheet | PI 320<sub>MIT</sub>

Incentives for Oregon customers of Portland General Electric, Pacific Power, NW Natural, Cascade Natural Gas and Avista.

All Savings Within Reach work must be performed by a Savings Within Reach Trade Ally and comply with <a href="#">Home Retrofit Specification Manual</a> requirements. Incentives listed are paid to the trade ally.		
Energy Improvement	Requirements	Incentive
<b>Existing Heat Pump Controls</b>	Must be added to an existing heat pump with electric furnace auxiliary heat. Heat pump must be primary heat source. Visit <a href="http://www.energytrust.org/heatpumpcontrols">http://www.energytrust.org/heatpumpcontrols</a> for eligible models and more information. Thermostat must be set to 35°F lockout or as close as possible. Cannot be combined with other controls incentives or ducted heat pump incentive.	\$250
<b>Gas Furnace</b>	90% AFUE or greater. Must be home's primary heat source. A CO monitor is required on every floor with a bedroom.	\$550
<b>Heat Pump Water Heater Tier 3</b>	Eligible models must meet Northwest Energy Efficiency Alliance's Advanced Water Heat Specification Tier 3 and replace an existing electric water heater to qualify for this cash incentive.	\$375

## Important Savings Within Reach Terms and Conditions:

- Savings Within Reach is available for customers who meet eligibility requirements in the *Form 310MIT: Verification of Income Qualification*.
- Savings Within Reach incentives are available for qualifying projects installed in owner-occupied single-family homes and owner-occupied manufactured homes with land ownership.
- Details of this program, including incentives, are subject to change without notice. Updates will be communicated to participating contractors by mail or email.
- Each Savings Within Reach incentive is available once per site.
- Application must be submitted within 60 days of installation.
