Energy Trust of Oregon to release a request for information regarding automated meter data analytics

Request for Information to be released on May 12

PORTLAND, Ore. — April 20, 2017 — Energy Trust of Oregon seeks a vendor to provide information on an automated meter data analytics platform (AMDA platform) to support the management, delivery and evaluation of residential and commercial energy efficiency programs. For the purpose of this Request for Information (RFI), Energy Trust is seeking a software tool capable of providing automated estimates of energy savings based on customer electric and gas usage.

Initial emphasis will be placed upon AMDA applications to support the delivery of residential programs, with additional interest in exploring specific uses of the application for commercial programs which may include customer targeting initiatives. The selected AMDA platform vendor will work with Energy Trust evaluation staff to support the organization's assessment of the platform's underlying methodology and feasibility of utilizing the platform to support formal impact evaluations.

Energy Trust will release the RFI on May 12, 2017, with submissions due to Energy Trust on June 16, 2017. Energy Trust will negotiate with the selected vendor for a contract to begin on January 1, 2018.

Energy Trust of Oregon is an independent nonprofit organization dedicated to helping utility customers benefit from saving energy and generating renewable power. Our services, cash incentives and energy solutions have helped participating customers of Portland General Electric, Pacific Power, NW Natural, Cascade Natural Gas and Avista save \$2.3 billion on energy bills. Our work helps keep energy costs as low as possible, creates jobs and builds a sustainable energy future. Learn more at www.energytrust.org or call 1-866-368-7878.
