

Leak Free for Free

SCHEDULE YOUR FREE ANNUAL COMPRESSED AIR LEAK REDUCTION SERVICE NOW

Feel the Power, Pocket the Change

While air compressors are essential industrial tools, they also use a lot of energy. A well-maintained, energy-efficient system contributes to productivity and profitability.

Unrepaired air leaks will increase the load and reduce efficiency by as much as 30 percent. A trade ally contractor, with support from Energy Trust, can identify and repair leaks once a year at no charge. This service is available to eligible Oregon industrial customers of Portland General Electric or Pacific Power who operate variable frequency drive, VFD, load/unload or start/stop controlled compressor systems between 25 and 250 horsepower.

GET MORE FROM YOUR ENERGY.

Provided by your trade ally and Energy Trust of Oregon.

To find participating trade allies and learn more about other energy-saving services for industry, visit www.energytrust.org/CALR, email production@energytrust.org or call **503.928.3154**.

Serving customers of Portland General Electric, Pacific Power,
NW Natural and Cascade Natural Gas.
