

Introduction

Energy Trust offers cash incentives to help eligible customers implement qualifying energy efficient lighting measures. Please review the Energy Trust’s **PI 490HL: Horticulture Lighting Incentives** for additional information about our lighting project specifications and requirements for horticulture grow operations.

To apply for lighting incentives, projects must (1) be submitted to Energy Trust by a Business Lighting trade ally for review and pre-qualification before any equipment purchase or installation activity begins; and (2) be pre-qualified for at least \$100 in incentive funding.

Only approved trade allies can offer Energy Trust’s Business Lighting incentives to their customers for qualifying measures. All proposed lighting projects must be submitted by an enrolled Energy Trust Business Lighting trade ally in accordance with program participation requirements.

If you are interested in potentially applying for Energy Trust lighting incentives for a proposed horticulture grow operation, you may complete and submit all the requested information below to initiate this first step in the review process.

Once we receive your information, an Energy Trust representative will contact you to discuss our program requirements and your proposed project in more detail, as well as next steps.

Company Information

Legal Business Name

Contact Name

OLCC Producer Name (if different)

Phone Number

Email Address

Site City

Expected Installation Start Date

Business Lighting Trade Ally Company Name

Will this be a Cannabis Horticulture Lighting Project? If so, you *must* complete this section. If not, skip this section and go to Additional Information.

- My site is one of the following (choose one)
 - Medical producer
 - Recreational producer with valid, active OLCC license
 - Recreational producer, OLCC pending

Horticulture Lighting

Production Efficiency | Project Information Intake | Form 400_{HL}

Energy Trust will require, at a minimum, all of the following with incentive application:

- ✓ Specification sheets for all lighting fixtures or products you are planning to purchase and install.
- ✓ Quote(s) from manufacturer or authorized reseller listing price per fixture.
- ✓ If you will be retrofitting an existing space, provide a quote for estimated labor costs.
- ✓ Site plan or proposed lighting layout or description.
- ✓ If a greenhouse, provide an analysis describing the need for supplemental lighting and hours of operation.
- ✓ Accurate, verifiable IRS Form-W9

Complete page 2 and submit this intake form, along with additional requested information, for review.

Please submit directly to: Lighting@energytrust.org

Please provide additional descriptions for each room or room type.
