Growing plants indoors produces a considerable amount of moisture. Too much moisture can be harmful to plants and must be removed to maintain desirable growing conditions. Moisture in indoor grow facilities is often managed using portable or standalone dehumidifiers. Energy Trust of Oregon now offers a cash incentive to upgrade to energy-efficient equipment which can also reduce your annual energy costs.

**Eligibility guidelines**

- Incentive is available for new portable or standalone dehumidifiers replacing existing working portable or standalone dehumidifiers
- Dehumidifiers must be installed in an indoor grow facility that operates year-round
- Greenhouse installations are not eligible

**Incentives**

<table>
<thead>
<tr>
<th>Equipment</th>
<th>Incentive</th>
<th>Product specifications</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dehumidifier</td>
<td>$9 per pint per day</td>
<td>Minimum Energy Factor of 2.8 L/kWh</td>
</tr>
</tbody>
</table>

**Savings made easy**

1. Establish your eligibility
2. Talk with a trade ally or vendor to help you select equipment that qualifies for Energy Trust incentives
3. Complete and submit the Industrial Cannabis Dehumidification form (Form 420CD). To apply online using DocuSign, visit [www.energytrust.org/forms/dehumidification](http://www.energytrust.org/forms/dehumidification)

Incentives are subject to funding availability and may change.
