If you’re looking for low-cost ways to reduce operating expenses, improve productivity and eliminate energy waste at your industrial facility, Energy Trust of Oregon can help. We provide free technical assistance to help identify and analyze low-cost Operations and Maintenance (O&M) efficiency measures at your site. Cash incentives for custom O&M projects are based on annual energy savings, at a rate of $0.08 per annual kilowatt hour and $0.40 per annual therm saved.

For a limited time, Energy Trust will pay up to 100% of the project installation cost. To qualify for this bonus incentive, your project must be completed, with all documentation submitted by December 31, 2020.

**What projects are eligible?**

- Existing projects are eligible if installation is completed after May 15, 2020
- New projects

If you have an O&M project that you’ve set aside, please reach out to your Energy Trust representative. Your project may be eligible for the bonus if completed by December 31, 2020.

Get more from your energy. To learn more, contact your Energy Trust representative or call **1.866.202.0576**.
