

Qualifying Extended Capacity Heat Pumps

Residential
Effective June 1, 2024

Models listed below qualify for Energy Trust’s Extended Capacity Heat Pump incentive. Qualifying equipment must have a maximum capacity at 17°F of 85% or more of their rated or nominal capacity at 47°F. Indoor Configuration: Eligible system configurations must include a central ducted system with traditional air handler (**Slim duct types do not qualify**) serving the primary living space of the home. If you have questions about model eligibility or indoor configurations, please contact us at residential@energytrust.org.
