

COST-SAVING RESOURCES FOR INDUSTRY AND AGRICULTURE

Industry-specific services

Energy Trust supports Oregon industrial and agricultural businesses of all types, including:

- Large industrial operations
- Cannabis and hemp cultivation
- Cold storage
- Dairies
- Food processing
- Foundries
- Greenhouses
- High technology
- Irrigation
- Landfill
- Manufacturing
- Metal fabrication
- Nurseries
- Pulp and paper mills
- Water and wastewater treatment
- Wineries
- Wood products

Expertise and incentives help you boost productivity and trim costs

In a competitive economy, controlling costs and maximizing productivity are keys to survival and success. And for industrial and agricultural businesses—major drivers in Oregon’s economy—energy efficiency is an especially critical part of the equation.

Energy Trust of Oregon can help industrial customers identify capital improvements and cash incentives that reduce the cost of investing in efficiency. Besides reducing energy costs for years to come, efficiency upgrades often improve productivity and quality.

Put us on your energy team

- Quick start with one call to a program representative
- Industry experts and a network of contractors to advise you on the most cost-effective upgrades for your operation
- Cash incentives to help reduce your capital investments

Comprehensive resources help you maximize savings

Custom Capital Projects:

You can turn to Energy Trust for scoping studies that identify capital improvements that can yield energy and cost savings. Your facility could qualify for:

- No-cost technical studies—typically valued at up to \$20,000—identify the most cost-effective energy-saving solutions
- Technical assistance to develop project specifications, evaluate contractor bids and verify project completion
- Cash incentives that can cover up to 80% of the project cost

Custom Operations & Maintenance

Energy Trust can help identify simple changes to the operation and maintenance practices at your facility that can often produce large energy savings.

- Expertise to help industrial facilities tune their O&M practices and optimize systems to improve and maintain energy performance by up to 20%
- Cash incentives, based on resulting annual energy savings, can cover up to 50% of your costs—or up to 90% of installation costs if you complete the project within 90 days

Strategic Energy Management

Energy Trust can work with your organization to find low and no cost ways of capturing savings of 3 to 5% by examining how facility use energy and adopting a customized strategic approach to energy management that is customized for your organization. This offering includes:

- Guidance to identify, cultivate and train an internal energy champion and energy team
- Onsite energy assessment
- Annual savings goals set in an energy action plan
- Employee engagement in energy awareness
- Cash incentives based on annual energy savings
- Implementation of low and no cost energy saving improvements

Standard Incentive Solutions

Industrial and agricultural businesses of all sizes may be eligible for cash incentives for energy-efficiency upgrades including:

- Battery chargers
- Indoor Agricultural dehumidifiers
- Compressed air systems
- Greenhouse upgrades
- Hot water boilers
- Insulation
- Irrigation equipment
- Lighting and controls
- Municipal water leak repair
- Pumps and fans, motor rewinds and variable speed drives
- Radiant heat
- Renewable energy projects
- Refrigeration
- Solar electric systems
- Welders

Support from start to finish

Energy Trust's industrial and agricultural process engineers can advise businesses of all sizes on energy solutions for their facilities. These engineers are highly skilled, industry-specific experts who understand what works in your operation and how to make the most of energy-saving opportunities.

At no cost to you, we can help determine the most cost-effective energy upgrades for your facility. Then be a resource to help keep your project on track—from planning through completion.

In addition, Energy Trust trade ally contractors provide advice, information on cash incentives and installation services for industrial, manufacturing and agricultural businesses. Find a trade ally by visiting www.energytrust.org/find-a-contractor.

Our program team is ready to explain program requirements, answer your questions, and get started on your project.
