

MANUFACTURED HOME WILDFIRE RECOVERY

REBUILD WITH FINANCIAL ASSISTANCE AND PERSONAL SUPPORT

If your community has been impacted by wildfire, Energy Trust of Oregon offers resources to help you replace your manufactured home.

Receive Energy Trust **incentives of up to \$16,000, plus additional funding** through Oregon state agencies and recovery programs. Find the support you need to rebuild and live comfortably in a new, energy-efficient manufactured home.

HERE'S HOW IT WORKS:

- 1 Contact county or state agencies for assistance**
If you're a resident of Jackson County, ACCESS Center for Community Resilience (CCR) is the best place to start. Visit www.accesshelps.org/ccr, call **541.414.0318** or email ccr@accesshelps.org for assistance. If you're not a resident of Jackson County or you are looking for additional resources, call the Oregon Wildfire Transition Assistance Hotline at **833.669.0554** or visit www.wildfire.oregon.gov.
- 2 Develop your recovery plan**
ACCESS CCR or the Oregon Wildfire Transition Assistance Hot Line will put you in touch with a long-term recovery coordinator who can help identify funding to support your recovery plan.
- 3 Reserve your Energy Trust funding**
Contact an Energy Trust navigator at mhreplacement@energytrust.org or **503.374.1660** to reserve funding from Energy Trust, which can be combined with other funding sources.
- 4 Plan your project**
Secure a written bid that includes the cost of your new home and all other project costs.
- 5 Sign sales contract**
With your financial package complete, you are ready to sign your purchase agreement for a new home.
- 6 Manage your project**
Maintain communication with your vendors, as they may provide updates on timing and have requests for information.
- 7 Move in**
Work with Energy Trust to complete a quality control inspection of your new home.

ELIGIBILITY AND FUNDING

To be eligible for funding, your:

- Current home must have been constructed prior to 1995
- Primary heating fuel source must be electric or gas and provided by a participating utility
- Household income must meet Savings Within Reach guidelines:
www.energytrust.org/income-eligibility

BENEFITS OF ENERGY-EFFICIENT MANUFACTURED HOMES

Older manufactured homes, especially those built before 1995, have less-efficient windows, insulation and heating. Your navigator will help you receive financial assistance for a newly built manufactured home that provides:

- Great year-round comfort
- Lower monthly energy costs
- Healthier indoor air

HOME SIZE	INCENTIVE FOR NEW ENERGY STAR® HOME	INCENTIVE FOR NEW NEEM+ HOME
Single wide	\$10,000	\$11,000
Double wide	\$15,000	\$16,000

WHAT'S IN AN ENERGY STAR HOME?

ENERGY STAR certification requires specific built-in features that reduce energy use and increase comfort. Certified homes are far more efficient than homes built to code, which can save you hundreds of dollars a year on energy costs.

GO FURTHER WITH A NEEM+ HOME

NEEM+ is a manufactured home certification tier that goes beyond minimum code requirements. The upgraded thermal shell and added efficiency features can provide up to 30% more energy savings.
