

AIR SOURCE HEAT PUMP INCENTIVES INCREASE SAVINGS FOR COMMERCIAL BUILDINGS

Air source heat pumps are both efficient and environmentally friendly which make them attractive for commercial buildings. Energy Trust of Oregon offers incentives on a variety of air source heat pumps to save your customers money on these products.

AVAILABLE INCENTIVES INCLUDE:

HEAT PUMP TYPE	INCENTIVE
Ductless Heat Pump (Lodging Only)	\$500 per ton of cooling capacity
Packaged Terminal Heat Pump (Lodging Only)	\$800 each
Server/Telecom Room Mini-Split Air Conditioner	\$250 per ton of cooling capacity
Air-Cooled Variable Refrigerant Flow (VRF) Multi-Split Ductless Heat Pump	\$1 per sq ft of area served by VRF
Commercial Ductless Heat Pump - New or Replacement	\$300 per ton
Commercial Heat Pump Water Heater	\$800 each

WHO IS ELIGIBLE?

Cash incentives are available for qualifying equipment upgrades to a variety of commercial buildings. To qualify, property must be:

- » An existing commercial structure in Oregon
- » Receiving utility services from Portland General Electric or Pacific Power
